

Benta Pharma Industries

LETTER FROM THE CEO

Benta Pharma Industries has become a leader in the pharmaceutical and healthcare industry, aiming for excellence, embracing innovation and establishing partnerships for sustainable growth. At BPI, we are committed to improving human health and well being through manufacturing High-quality pharmaceutical products and medical devices.

Clinching a summit means achieving a new goal, however, every new peak reveals new challenges on the horizon. For this reason we have already begun implementing a new strategic plan designed to drive the company into fulfilling its broader vision.

Founded on the backbone of quality, we comply with the highest international quality standards; we are certified by multiple international, regional and local organizations. BPI has earned the European Good Manufacturing Practice (GMP), ISO 9001:2015 and ISO 13485:2016. BPI holds several patents for its products; The medical devices we produce meet the highest standards of the European Union and they have acquired the CE marking.

Innovation for us is another fundamental elements of business. Our scientific professionals and experienced talents conduct extensive research on the current trends as well as integrate the newest technologies and industrial operations into our manufacturing processes. BPI has developed state-of-the-art production facilities that include the production of sterile, cytotoxic and biotech products in addition to intra ocular lenses.

We have laid the foundations and we are now venturing into the future armed with extensive experience in the healthcare field as part of Benta Group. BPI is expanding strategically, with a presence in over 40 countries so far. Headquartered in Lebanon, BPI has regional head offices in Europe, the Gulf and Africa. Our industrial operations take place at ultramodern multipurpose sites located in Lebanon and Egypt. We work eagerly to develop strong collaborations that ultimately help us expand each community and together with our partners we can work on our common goal of improving patients' lives.

The key ingredients of BPI's success have been quality, innovation, development, talented people and expansion. Through our hard work and dedication in creating high quality products, integrating the newest technologies into our manufacturing processes, and continuously developing the talents of our employees, we are able to expand globally and become leaders in the pharmaceutical field. The true beneficiaries of our efforts are our patients as well as our community and, that is the biggest success of all.

Sincerely yours,
Bernard Tannoury
Chairman & CEO
